Machine Learning Engineer with hands-on experience in NLP, text classification, and cloud-based systems. Proficient in building, evaluating, and optimizing end-to-end ML pipelines and scalable architectures using Python, TensorFlow, and scikit-learn. Experienced in API integration and cloud platforms, supported by multiple Oracle and AWS certifications.

Work Experiences

Freelance

May 2025 - Oct 2025

Machine Learning Engineer

- Built end-to-end NLP classification pipelines across 3 NLP projects (2 real-world, 1 academic), with NLP pipelines (preprocessing, feature engineering, training, evaluation) using python, pytorch, and scikit-learn.
- Implemented and optimized SVM, CNN, and Bert base model, achieving up to 90% accuracy and f1-score on NLP classification tasks.
- Trained models on 1k+ labeled text samples, applying oversampling and weighted loss to address class imbalance.
- Worked independently to evaluate, document, and iterate models, ensuring reproducibility and clarity for future development.

Independent Study Program - RevoU

Feb 2024 - Jun 2024

Data Analyst

- Performed data cleaning and preprocessing using Excel to ensure data quality, consistency, and readiness for analysis
- Conducted exploratory data analysis (EDA) using BigQuery to identify patterns, trends, and actionable insights from large datasets
- Built interactive dashboards and visualizations using AWS QuickSight to present key metrics and insights in a clear, stakeholder-friendly format
- Delivered analytical findings to judges and lecturers through structured reports and data-driven storytelling during final presentations
- Developed retrieval-augmented generation (RAG) solutions using AWS Bedrock to integrate external data sources into generative AI applications

PT. Gajah Tunggal Tbk

Jul 2024 - Dec 2024

Internship

- Developed and deployed an android-based qr barcode system (flutter + php) used daily by factory operators, replacing a fully manual paper-based logging process.
- Digitized 2+ core operational workflows (raw material input & transaction inventory tracking), reducing processing time (estimated ~50–70%) and minimizing repetitive manual input.
- Built and maintained restful apis in goLang supporting hundreds of input/output transactions per day in a production environment.
- Collaborated directly with 3–5 operations and warehouse staff on-site to align system behavior with real workflows, enabling full adoption within weeks after deployment.

Education Level

Universitas Multimedia Nusantara - Jakarta, Indonesia

Bachelor of Informatics, 3.61/4.00

Skills, Achievements & Other Experience

- Certification**  (2025): Oracle Cloud Infrastructure (OCI) Data Science Professional – Certified in end-to-end machine learning workflows using OCI, including data preparation, model training, and deployment.
- Certification**  (2025): Oracle Cloud Infrastructure (OCI) Generative AI Professional – Certified in building, deploying, and managing generative AI solutions using OCI, including model training, fine-tuning, and cloud-based inference.
- Certification**  (2025): Oracle Cloud Infrastructure (OCI) AI Associate – Certified in implementing and managing AI solutions on OCI, covering core AI concepts, model deployment, and cloud-based inference.
- Certification**  (2025): Oracle Cloud Infrastructure (OCI Search AI Vector) – Certified in implementing vector search and AI-powered retrieval solutions on OCI, including indexing, similarity search, and scalable cloud deployment.
- Certification & Bootcamp**  (2025): REVOU X AWS – Completed REVOU x AWS program, deploying 3+ cloud-based services with CI/CD pipeline, IAM configuration, and scalable architecture patterns.
- English Proficiency: IELTS 6.0 | TOEIC 815**  (2025): Used English daily for technical documentation, team discussion, and presentation in academic & project environments.
