portofolio.arrafipamungkas.space

AI/ML Engineer focused on NLP, ML architecture, and AI infrastructure. Experienced in building end-to-end machine learning platforms covering data ingestion, automated labeling, model training, deployment, storage, and production operations. Hands-on with workflow orchestration, containerized services, CI/CD, GPU environments, and virtualized infrastructure using Airflow, Docker, GitHub Actions, Proxmox, PostgreSQL, and MinIO.

Work Experiences

PT. Infiniti Reka Solusi

Mar 2026 - Present

Data Scientist

- Architect and operate scalable data and ML pipelines that ingest and process Indonesian news from 1,000+ sources into structured datasets for NLP model development.
- Orchestrate end-to-end production workflows using Apache Airflow, automating data collection, validation, storage, labeling, model training, and deployment with scheduling, dependency management, and failure recovery.
- Deploy and maintain containerized data and ML services across Linux and GPU-based environments using Docker, K3s, and vLLM, supported by PostgreSQL and MinIO storage.
- Administer Proxmox-based infrastructure spanning 6–10 virtual machines while building monitoring dashboards to maintain pipeline visibility, resource efficiency, and operational reliability.

Freelance

May 2025 - Oct 2025

Machine Learning Engineer

- Built end-to-end NLP classification pipelines across 3 NLP projects (2 real-world, 1 academic), with NLP pipelines (preprocessing, feature engineering, training, evaluation) using python, pytorch, and scikit-learn.
- Implemented and optimized SVM, CNN, and Bert base model, achieving up to 90% accuracy and f1-score on NLP classification.
- Trained models on 1k+ labeled text samples, applying oversampling and weighted loss to address class imbalance.
- Worked independently to evaluate, document, and iterate models, ensuring reproducibility and clarity for future development.

PT. Gajah Tunggal Tbk

Jul 2024 - Dec 2024

Internship

- Developed and deployed an android-based qr barcode system (flutter + php) used daily by factory operators, replacing a fully manual paper-based logging process.
- Digitized 2+ core operational workflows (raw material input & transaction inventory tracking), reducing processing time (estimated ~50–70%) and minimizing repetitive manual input.
- Built and maintained restful apis in golang supporting hundreds of input/output transactions per day in a production environment.
- Collaborated directly with 3–5 operations and warehouse staff on-site to align system behavior with real workflows.

Education Level

Universitas Multimedia Nusantara 📍 - Jl. Scientia Boulevard, Gading Serpong,
Tangerang, Banten, Indonesia

Jul 2021 - Oct 2025

Bachelor Information Technology, 3.61/4.00

Skills, Achievements & Other Experience

- **Certificaiton** 📄 (2025): Oracle Cloud Infrastructure (OCI) Data Science Professional – Certified in end-to-end machine learning workflows using OCI, including data preparation, model training, and deployment.
- **Certification** 📄 (2025): Oracle Cloud Infrastructure (OCI) Generative AI Professional – Certified in building, deploying, and managing generative AI solutions using OCI, including model training, fine-tuning, and cloud-based inference.
- **Certification** 📄 (2025): Oracle Cloud Infrastructure (OCI) AI Associate – Certified in implementing and managing AI solutions on OCI, covering core AI concepts, model deployment, and cloud-based inference.
- **Certification** 📄 (2025): Oracle Cloud Infrastructure (OCI Search AI Vector) – Certified in implementing vector search and AI-powered retrieval solutions on OCI, including indexing, similarity search, and scalable cloud deployment.
- **Certification & Bootcamp** 📄 (2025): REVOU X AWS – Completed REVOU x AWS program, deploying 3+ cloud-based services with CI/ CD pipeline, IAM configuration, and scalable architecture patterns.
- **English Proficiency:** **TOEIC 815 | IELTS Practice Test 6.0** 📄 (2025): Used English daily for technical documentation, team discussion, and presentation in academic & project environments.
